

## Preliminary Technical Leaflet

Revision: 19.07.06

# Permablend VPA 371

## Optical white brightener

for water thinnable and water mixable coatings

Art.-No. 134010-05175

### Description

Permablend VPA 371 is an excellent white brightener to mask the yellowing descent of white pigmented paints.

Permablend VPA 371 is well compatible with nearly all water thinnable and water mixable binders.

### Technical Data

|                 |   |
|-----------------|---|
| Solids content  | 2.2%                                    |
| Density         | 1.04 g/cm <sup>3</sup>                  |
| Solvent         | propylene glycol                        |
| Solvent content | 59%                                     |
| Pigment type    | special composition of organic pigments |
| pH-value        | 7.5 - 8.5                               |

### Application and Properties

The addition amount varies from 0.2 - 0.5% on total formulation.

Permablend VPA 371 is packed in 25 kg and 100 kg steel drums.
